## STATISTICAL REPORT

### 7th Jatiya Shangshad Election

JUNE 12, 1996

Bangladesh Election Commission

# PREFACE

After completion of every general election Bangladesh Election Commission traditionally publishes reports of the election. These reports centered round the background of every elections, preparatory works incidental to, and connected with, the holding of elections, principal election functions, costing and acquisition of materials, conduct, management, consolidation and declaration of election results with a little statistical information.

At the outset of Parliaments election of June, 1996, the Election Commission decided for the first time to publish a separate report based on election results that can represent stastically and graphically the different features of the election results. In view of this, attempts have been made in organising this Statistical Report of the SEVENTH Parliament election held on June 12, 1996. This is an analytical report of the general election and a few on bye-elections subsequently held.

The compilation of information has been organised into seven chapters containing basic information, geographical indication of 300 constituencies for election of members of Parliament, the summary of the results in tabular form, number of party-wise candidates and symbols allocated, division-wise list of seats won by the different political parties and independent candidates with their respective symbols, votes cast, information of participants, graphic representation of votes cast, list of elected candidates, forfeiture of security deposits, etc. with annexures containing important basic information.

It is hoped that the information presented here will meet the growing need and curiosity of different interested quarters inside and outside the country to satisfy interest in related fields.

The analysis shown in this Report is a huge task requiring a high level of experience and skills. The computer-support that made the ideas of the Election Commission possible was generously extended by the GIS unit of the Local Government Engineering department. Sincere thanks and appreciation are extended to the officials of the Local Government Engineering Department for extending such generosity and valuable assistance for preparation of this volume.
